PIONEERING SPIRIT IS OUR ORIGIN

The story began in 1972 with the first powered stripper for stripping floor coverings and marked the first major milestone in the WOLFF brand's success story. For 50 years, together with you, we have repeatedly tested and questioned the limits of feasibility of machines and special tools.

All these efforts and endeavours now result in a machine category that is absolutely new for WOLFF - the Ride-On Stripper. Our claim and our customer promise also obliges us to go one step further here. We are therefore proud to present our Independence, which will be the new top of the range of WOLFF machines from 2023.

We look forward to experiencing great moments and exciting times together with you.

Item no.	Scope of delivery
38764	Vario Silent Stripper 1 blade 250 x 60 x 0.7 mm, 1 blade 250 x 60 x 1.0 mm, 1 blade 250 x 60 x 1.5 mm, 1 U-blade top cutting edge, 1 U-blade bottom cutting edge, tool set, extension cable, protective gloves, blade guard
42453	Vario Silent Stripper 115V UK
50202	Vario Silent Stripper 115V US

PULL-BACK-SYSTEM

The pull-back system was developed to make it easy to pull the Silent Vario stripper backwards. When you reach a wall or other obstacle while working, you can lift the drive wheels by simply pulling the handle. The machine stops even though the wheels can continue to turn. If you pull harder on the handle, you can pull the machine back until the next sheet is to be detached. When the handle is moved forward again, the drive wheels touch down on the floor again and the machine moves forward again. When working, the handle must be pushed slightly forward so that the small transport castors are raised.

5C-QUALITY

FINEST DIAMOND TOOLS -MADE IN GERMANY

All diamond segments and diamond grinding discs with 5C quality can be recognised by the diamond logo.

5C quality stands for:

- 1. concrete specification of the diamond quality
- 2. constant size and strength of the PCDs
- 3. constant overall height of the segments and base bodies
- 4. clear areas of application
- 5. consistent quality assurance

The diamond segments from German origin have precisely defined PCD proportions and are subjected to permanent quality controls such as microscope inspection, segment fracture test, strength strength test and shear force measurement. With the 5C quality, you can be sure of working successfully with and stable products.

VACUCLEAN 2

2-MOTOR VACUUM CLEANER

High-performance industrial vacuum cleaner for coarse dirt and dust with large filter surface. Two powerful by-pass AC motors, dust class M filter with very large surface area and maximum manoeuvrability make the vacuum cleaner the ideal extraction solution for dust extraction of any kind.

Technical specifications

- Voltage: 230 V
- Power: 2.300 W
- Dimensions (L x W x H): 590 x 480 x 1,010 mm
- Weight: 35 kg
- Hose length: 5 m
- Air volume: 360 m³/h
- Negative pressure: 25 kPa
- Filter category main filter: M
- Tank capacity: 20 l
- Suction connection: 50 mm
- Noise level: 76 dB(A)
- Cleaning system: Dustop
- Emptying system: Detachable container

Features

- Large filter surface for long service life
- Integrated filter cleaning system
- Robust and 100% all-steel construction
- Lowerable collection container with optional use of disposable bags
- Two powerful AC motors with by-pass Cooling
- Low noise level
- Compact and mobile
- Quick and easy change of the main filter

Item no.	Scope of delivery

82452	Vacuclean 2 HEPA Reducing piece 50/38, 5 metre PU hose (50 mm diameter), suction tube, floor nozzle 430 mm, HEPA filter

SUCTION UNIT

The suction is provided by two bypass suction motors, which can also be operated separately and are mounted in a robust steel housing for appropriate sound insulation.

FILTER UNIT

The polyester cartridge filter with a large filter surface area installed in the filter chamber ensures a long service life and thus prevents the filter from becoming clogged quickly. A semi-automatic Dustop filter cleaning system allows the cartridge filter to be cleaned very easily and efficiently. By closing the vacuum is created in the filter chamber. Air flows in through the Dustop flap, which is opened several times. The filter cartridge is freed of dirt. This guarantees a constant and high suction power and the dust is not dispersed into the working environment.

COLLECTION UNIT

The vacuumed material falls into a removable, collection container, which allows for quick and easy disposal of the vacuumed material. Disposable bags can also be used on request.

VACUCLEAN 2 LP

2-MOTOR VACUUM CLEANER WITH LONGOPAC SYSTEM

The high-performance industrial vacuum cleaner Vacuclean 2 LP has a system with which the vacuumed dust is removed and collected. This makes the removal of fine, toxic or harmful dusts absolutely safe. Ideal for vacuuming up dusts during construction and surface treatments.

Technical specifications

- Voltage: 230 V
- Power: 2.300 W
- Dimensions (L x W x H): 500 x 480 x 1250 mm
- Weight: 55 kg
- Hose length: 5 m
- Air volume: 360 m³/h
- Negative pressure: 25 kPa
- Filter category main filter: M
- Suction connection: 50 mm
- Noise level: 76 dB(A)
- Cleaning system: Dustop

Features

- Large filter surface for long service life
- Robust and 100% all-steel construction
- Two powerful AC motors with by-pass Cooling
- Compact and mobile
- Quick and easy changing of the main filter
- Height adjustable to facilitate transport
- Sliding dumper for DUSTOP system included
- Standard and interchangeable collection container or Longopac system

SUCTION UNIT

The suction is provided by two bypass suction motors, which can also be operated separately and are mounted in a robust steel housing for appropriate sound insulation.

FILTER UNIT

The polyester cartridge filter with a large filter surface area installed in the filter chamber ensures a long service life and thus prevents the filter from becoming clogged quickly. A semi-automatic Dustop filter cleaning system allows the cartridge filter to be cleaned very easily and efficiently. By closing the vacuum is created in the filter chamber. Air flows in through the Dustop flap, which is opened several times. The filter cartridge is freed of dirt. This guarantees a constant and high suction power and the dust is not dispersed into the working environment.

LONGOPAC-SYSTEM

The Longopac system is an "endless" bag system (20 metres long) whose weight and length can be adjusted as needed to ensure there is no contact between the operator and the dust. A practical lifting system means that the industrial vacuum cleaner with bag can be lowered to make transport easier. Hygienic, economical and environmentally friendly!

M 30 DUST EXTRACTOR

COMPACT VACUUM CLEANER FOR WET AND DRY CLEANING

Very compact and powerful wet/dry vacuum cleaner for the removal of hazardous and partially respirable fine dusts (dust class M).
Lightweight, compact dust extractor for all common construction sites.

Technical specifications

- Voltage: 220-240 V
- Power: 1.380 W
- Tank volume: 30l
- Sound pressure level: 69 dB
- Air volume: 74 l/s
- Weight without accessories: 13,5 kg
- Dimensions: 56 x 37 x 58 cm

Features

- Dust class: M
- Efficient fully automatic filter cleaning
- Manually adjustable suction power
- Anti-static suction hose
- Recommendation: Full efficiency by using the bag filter #163023 (available as accessory)

HOSE FILTER

With 8 PTFE-coated hoses for vacuuming large quantities of wood and fibre dust of all kinds. The coating and its special geometry effectively prevent blocking. For the first time, it is possible to vacuum fibrous dust without a filter bag. The filter is insensitive to moisture and rot-proof, certified for dust class L and guarantees a high dust collection efficiency of 99.9 %.

- Voltage: 230 V
- Power: 170 W
- Max. Volume flow: 620 m³/h
- Idle speed: 0 - 3930/min
- Dust extraction connection: 125 mm
- Dimensions (L x W x H): 238 mm x 390 mm x 508 mm
- Weight (without filter): 6,0 kg
- Cable length: 3.5 m

Features

- Hazardous, respirable fine dust is extracted by means of coarse and fine dust filters/H-filters
- Dust can be filtered/extracted directly at the point of origin
- Automatic volume flow monitoring
- The negative pressure is adjustable by means of a rotary switch and can thus be adapted to the requirements on the construction site
- Low working noise
- Compact design
- Easy to transport due to low weight of 6.0 kg

POWER X 1600 MIXER

1,600 WATT 2-SPEED STIRRER WITH SPEED CONTROL

For mixing thin and thick-bodied mortar (e.g. compounds, coatings, tile adhesives)

Technical specifications

- Voltage: 230 V
- Power: 1.600 W
- Presettable maximum speed 1st gear: 210/325/530 rpm
- Presettable maximum speed 2nd gear: 320/490/780 rpm
- Tool holder: M14
- Max. Diameter for stirrer: 160 mm
- Weight: approx. 5 kg

Features

- Robust 2-speed gearbox
- 1,600 W 2-speed stirrer with speed control in 3 adjustable maximum speeds
- Ergonomic handles on the drive
- Full-wave electronics: Soft running, temperature monitoring, overload protection
- Excellent for mixing larger containers up to 75 kg (in combination with the WOLFF 75 l stirring station)
- Tool holder M14

Item no.	Scope of delivery
84169	Power X 1600 mixer Mixer type KR 140 S/M14

POWER X 1000 MIXER

1,010 WATT 1-SPEED STIRRER

For mixing thin- and thick-bodied mortar (e.g. levelling compound, coatings)

Technical specifications

- Voltage: 230 V
- Power: 1.010 W
- Speed: 0 - 780 rpm
- Tool holder: M14
- Max. Diameter for stirrer: 120 mm
- Weight: 4,5 kg

Features

- Robust 1-speed gearbox
- Ergonomic handles
- Tool holder M14

Item no.	Scope of delivery
83924	Power X 1000 mixer Mixer type KR 120 S/M14

EXTENSION

Extension piece for stirrer. Enables mixing in large mixing buckets.

Item no.	Product	Dimensions
68353	Extension	200 mm

STIRRER TYPE MK

Robust professional stirrer with long service life. With 3 mixing wings for fast working. High mixing effect from bottom to top. Machine holder M14.

Item no.	Product	Dimensions
13604	Stirrer type MK	120 mm
13611	Stirrer type MK	160 mm

STIRRER TYPE KR

Very high shearing forces, easy to clean. For very tough adhesives and sealants. Ideal for compounds, prevents the formation of lumps. Machine holder A/F10.

Item no.	Product
13605	Stirrer type KR - 90S
13606	Stirrer type KR - 120S

SWISS TROWEL

For cleaning and applying tile adhesive before laying tiles, slabs, mosaics, etc.

- Made in Germany

Item no.	Product	Dimensions
56204	Swiss trowel	500 mm

ADHESIVE TROWEL

Trowel with lateral insertion of adhesive toothed strips

- For toothed strips with 280 mm length
- With very easy-grip and ergonomic handle
- Ideal for the application of UZIN KE 68 T
- You will find our adhesive notches overview on page 102

Item no.	Product	Dimensions
56205	Adhesive trowel with side insert	280 mm

SMOOTHING TROWEL

Thanks to its generous dimensions, it is suitable for smoothing a wide range of surfaces.

- The blade of the trowel is not toothed so that the smoothed surfaces are free of structures.
- For comfortable working and safe holding of the trowel, there is an ergonomically shaped handle is provided. It is permanently and stably connected to the blade.

Item no.	Product	Dimensions
56203	Smoothing trowel	280 x 135 mm

SMOOTHING TROWEL FOR SCREED LAYERS

With rectangular blade made of 0.7 mm thick, hardened and polished spring band steel, light metal blade and ergonomically shaped wooden handle.

Item no.	Product	Dimensions	PU

SMOOTHING COMPOUND RAKE INCL. HANDLE

- Enables levelling or compound to be applied in a standing position
- 2 pins for adjusting height
- Mimics hand movement through special articulated joint

Item no.	Product	Dimensions
65503	Smoothing compound rake incl. handle	60 cm

Item no.	Accessories
65504	Large area rake replacement
65497	Universal telescopic handle
67983	Handle holder with articulated joint

Item no.	Accessories
65505	Replacement pins for large area rake, 1 pair

UNIVERSAL TELESCOPIC HANDLE

- Enables ergonomic working while standing
- Various attachments possible
- With special adapter can also be used for deflation rollers
- Adjustable from 97 cm to 170 cm length

Item no.	Product
65497	Universal telescopic handle

ROLLER BRACKET ATTACHMENT FOR TELESCOPIC HANDLE

Enables use of paint rollers with universal telescopic handle.

Item no.	Product
87948	Roller bracket attachment for telescopic handle

HANDLE HOLDER (ADAPTER) FOR ALL RAKES

Allows use of telescopic handle (#65497) for squeegee, pin rake and large area screed rake.

Item no.	Product
87949	Handle holder (adapter) for all rakes (without articulated joint)

LEVELING COMPOUND RAKE

For applying self-levelling compound. For working while standing with mounting bracket for wooden handle.

Item no.	Product	Dimensions
52298	Leveling compound rake including R2 adhesive notch	56 cm

Item no.	Accessories
166397	Adhesive notch R1
166398	Adhesive notch R2
166399	Adhesive notch R3

NOW EVEN BETTER!
WITH IMPROVED HANDLE MADE OF SUSTAINABLE MATERIALS AND OPTIMISED ALUMINIUM PROFILE INCLUDING EDGE PROTECTION.

PIN RAKE

Made of aluminium, 60 cm wide, with 6 hardened sliding pins and handle sleeve. For applying and spreading coatings and compounds. With high adjustable level control made of stainless steel. The regulation bar is continuously adjustable up to an application height of 13 mm.

Item no.	Product
51318	Large area rake

ADJUSTING GAUGE FOR PIN RAKE

For precise parallel adjustment of the large area rake 51318, so that it can be done quickly and accurately. Setting height: 1 mm, 1.2 mm, 1.4 mm, 1.6 mm, 1.8 mm and 2 mm.

Item no.	Product
38778	Adjustment bar for pin rake (#51318)

LARGE AREA SCREED RAKE

With machine mounting sleeve for handle or telescopic handle, holding piece made of angle iron and spare steel blade, 100 mm high, 0.6 mm thick and 2 continuously adjustable skids for uniform adjustment of any desired application height between 6 and 30 mm. Width 800 mm.

Item no.	Product
13658	Large area screed rake

Item no.	Accessories
13659	Spare steel blade
12887	Spare skids, VE 2 pcs.

MOISTURE METER

V1-D4 PROFESSIONAL

Designed for use in moisture measurements of substrates. Non-destructive moisture measurement method while maintaining a high accuracy of the measurement result.

Technical specifications

- Dimensions: 147 x 89 x 33 mm
- Power supply: Battery, 2 x AA 1.5 V
- Display: black and white with backlight
- Resolution: 128 x 64 pixels
- Operating temperature range: 5 °C up to 40 °C
- Available scales for substrates: Concrete, cement, anhydrite
- Relative scale
- IR surface temperature sensor
- 15.3 Scale/Digits

Features

- Easy to handle the device
- Real-time display of the readings on the easy-to-read display
- Suitable for pre-testing the readiness of building materials for covering during CM measurements

Item no.	Scope of delivery
71053	V1-D4 Professional moisture measuring instrument Battery pack, carrying case

BRUSH ELECTRODE SET BE-03

Item no.	Product

DRIVE-IN ELECTRODE PP-05

Item no.	Product
73772	Drive-in electrode PP-05 For measuring the moisture content in wood.

CLIMATE SENSOR CS-06 WITH CABLE

Item no.	Product
73773	Climate sensor CS-06 with cable For determining temperature, humidity and dew point.

CLIMATE SENSOR CS-10 WITH CABLE

Item no.	Product
83665	Climate sensor CS-10 with cable For determining temperature, humidity and dew point. To be left in the borehole on site. Supplied with #73775.

TUBE FOR CLIMATE SENSOR

Item no.	Product	PU
73775	Tube for climate sensor As a closure for the borehole for measuring the relative humidity in concrete (RFT/ KRL method)	20 pieces

SET FOR RESISTANCE MEASUREMENT TEST

Item no.	Product
73774	Set for resistance measurement test For measuring resistance and conductivity.

THERMOHYGROMETER

LVT 15 IR

Measurement of air temperature and relative humidity.

Technical specifications

- Power supply: Battery supply, 2 x AA 1.5 V
- Power consumption: 34 mA
- Dimensions: 146 x 79 x 26 mm (HxWxD)
- Display: monochromatic with backlight
- Resolution 128 x 64 pixels
- Operating temperature range: 5 °C to 40 °C < 80 % of
- Relative humidity without condensation

Features

- Calculation of the dew point
- Surface temperature measurement without additional sensor due to the built-in infrared sensor
- Optical and acoustic alarm for temperature differences

HYDROMETER

GM-200

For measuring the moisture of concrete, gypsum, cement.

Technical specifications

- Dimensions: 142 x 79 x 24 mm
- Power supply: Battery supply, 2 x AA 1.5 V
- Display: monochrome with 128 x 64 pixel resolution and backlight
- Manual display orientation
- Operating temperature: from 5 °C to 40 °C
- 9 measuring scales

Features

- Moisture measurement of wood possible
- Measurement without intervention in the investigated area
- Secure grip in the hand and comfortable handling due to small size, ergonomic shape and anti-slip rubber on the edges
- Manual display orientation
- Individual alarm limit value, also with acoustic signal

PRESSOMESS SHEAR STRENGTH MEASURING INSTRUMENT

Special measuring instrument for experts and surveyors in the flooring industry. For measuring the shear strength of substrates such as screeds, levelling compounds or wood-based materials.

- The shear force is measured with a hydraulic sensor
- The shear strength can be read on the display
- Tested by the FMPA, Otto-Graf-Institut, Stuttgart
- Max. Test force 5 kN

MEASURING DEVICE KRL TN 75|80

MEASURING DEVICE FOR DETERMINING THE RESIDUAL MOISTURE IN SCREEDS

The KRL method is a simplified and user-friendly measurement technique for testing the readiness of mineral-bound screeds, especially accelerated screeds.

Description of the measurement procedure

The KRL method is a standardised method according to DIN EN 17668. Its use for determining the moisture content of screeds is described in detail in TKB leaflet 18. The KRL method can be used to determine the corresponding relative humidity (RH) of a caulking sample and serve as a reliable indicator of the moisture condition of a screed before it is laid. Compared to other measurement methods for testing the readiness for covering, the KRL method offers numerous advantages, for example, meaningful results can be obtained even if the material type of the screed is not known. Since the KRL method does not require an exact material weight, there are no measurement errors due to weighing errors and no additional hazardous materials, such as calcium carbide ampoules, are required.

Features

- Dew point alarm at 75 or 80 % relative humidity (option for underfloor heating)
- Innovative sensor exchange
- Ergonomic housing
- Multilingual

Technical data

- Battery supply: 2 x AAA
- Languages: German, English, French, Dutch, Polish and Spanish
- Operating temperature range: -40 °C to 90 °C
- Relative humidity range: 0-100 % (±1.5 %)
- Display: Black / White with backlight
- Resolution: 102 x 64
- Available measurements: Air temperature, relative humidity, dew point and water content in one cubic metre
- Meter dimensions: 147 x 56 x 27 mm

SCREED JOINT CUTTER EF 135 18V

FOR FAST AND LOW-DUST CUTTING OF
MINERAL MATERIALS

Enables low-dust and fast working.
Universal battery pack, full
compatibility.

Technical specifications

- Battery voltage: 18 V
- Battery capacity: 5 Ah
- Cutting blade: Ø 135 mm
- Cutting blade width: 2 mm
- Cutting depth: 0 - 35 mm
- Speed: 8.500 rpm
- Weight with battery: 4.55 kg

Features

- The perfect solution for precise, clean and cordless work
- Cutting depth up to 35 mm
- Continuous depth adjustment
- Marking for centre of cutting blade
- Very compact due to battery operation
- Low-dust working
- Safe machine guidance due to roller chassis

POWER X 18V MIXER

FLEXIBLE AND INDEPENDENT MIXING

Flexible 2-speed mixer that can be used independently of the mains power supply thanks to battery operation.

Technical specifications

- Battery voltage: 18 V
- Battery capacity: 5 Ah
- Presetable maximum speed
 - 1st gear: 210/325/530 rpm
 - 2nd gear: 320/490/780 rpm
- Tool holder: M14
- Max. Diameter for stirrer: 120 mm
- Weight with battery: 5 kg

Features

- For mixing levelling and stable levelling compounds as well as coatings
- For mixing applications up to 30 kg
- Robust 2-speed transmission: for material-appropriate speeds and strong torque in 3 adjustable maximum speeds
- Convenient 3-step switch accessible from handle position without interrupting work, step 1: cleaning, step 2: mixing, step 3: agitating
- Full-wave electronics: Soft running, temperature monitoring, overload protection
- Ergonomic handles
- Tool holder M14

FRÄSMASTER 18V

COMPACT JOINT GROOVING MACHINE WITH UNRESTRICTED MOBILITY

Compact joint grooving machine with unrestricted mobility due to battery operation. Automatic depth control ensures the full formation of the milled joint even on uneven substrates.

Technical specifications

- Battery voltage: 18V
- Battery capacity: 5Ah
- Rotational speed: 5.000 rpm
- Milling depth: 7 mm
- Milling blade: 3.5 mm wide, elliptical, 12 teeth, Ø 130 mm
- Weight with battery: 5,5 kg

Features

- With adjustable side wheel e.g. for grouting rubber nap coverings
- Low-dust work due to improved chip catching
- Rotatable dust tube
- Easy adjustment of the milling depth up to 7 mm - even on very uneven floors
- No tilting due to optimum stability of the chassis on 3 rollers
- Protection against damage to the floor surface by automatic sliding back of the milling blade when the handle is lifted or released

Item no.	Scope of delivery

ANGLE GRINDER WS 125 18V

THE ALL-ROUNDER AMONG THE CORDLESS ANGLE GRINDERS

High cutting performance paired with maximum manoeuvrability. Universal battery pack, full compatibility.

Technical specifications

- Battery voltage: 18V
- Battery capacity: 5 Ah
- Cutting disc: Ø 125 mm
- Speed: 8.500 rpm
- Tool holder: M14
- Weight with battery: 2.4 kg

Features

- Ideally suited as an all-round angle grinder - especially for tilers
- Brushless motor with high efficiency
- Overload protection extends the service life of the machine
- Work safety functions: Soft start and restart lock
- 3-fold winding protection against dust. Reduces the wear of the motor and extends the service life
- Protective cover can be adjusted without tools
- Spindle lock
- Left and right mountable handle

PARQUET GROOVING MACHINE 18V

FOR EASY RENOVATION OF SOLID WOOD FLOORBOARDS

Cordless parquet grooving machine with unrestricted mobility due to battery operation. Automatic depth control ensures the full formation of the milled joint even on uneven substrates.

Technical specifications

- Battery voltage: 18V
- Battery capacity: 5 Ah
- Rotational speed: 8.000 rpm
- Milling depth 0-5 mm
- Milling blade: carbide, 9.0 mm wide, 6 teeth, Ø 130 mm
- Weight with battery: 6.2 kg

Features

- For reworking the V-groove that is no longer completely present after sanding solid wood floorboards.
- Low-dust work due to improved chip catching
- Rotatable dust tube
- Protection against damage to the floor surface by automatic sliding back of the milling blade when the handle is lifted or released

LINOCUT

SEAM CUTTER - THE CLASSIC

Perfect joints for all resilient floor coverings and needle punch.
A wide range of possible uses thanks to different stops!

Features

- Patented technology
- Top design
- Straight cut without straight edge
- Cuts from wall to wall
- Two blades for cutting in both directions
- Cuts the upper edge of the sheet and uses the lower edge as a guide
- Works directly in the adhesive bed
- Adjustable joint width
- Blade penetration depth adjustable

PRESSURE ROLLERS

FOR FLOOR COVERINGS

With carrying handles for more comfortable transport.

Features

- Rollers consisting of 4 castors that optimally adapt to the floor
- With extremely narrow roller gaps to prevent the formation of marks on the top layer

Item no.	Scope of delivery
56401	Pressure roller 30 kg with carrying handle, handle with grip
56402	Pressure roller 50 kg with carrying handle, handle with grip
56403	Pressure roller 68 kg with carrying handle, handle with grip

Item no.	Accessories
56404	Chassis for pressure rollers

WOLFF. GOING BEYOND YOUR LIMITS.

PRESSURE ROLLER FOR FLOOR COVERINGS

- Ideal for pressing down all floor coverings on small to medium surfaces
- Rollers adapt to uneven floors
- Contact pressure can be regulated with body weight, also suitable for left-handers

Item no.	Product	Dimensions
15834	Pressure roller for floor coverings (weight: 5.2 kg).	1.35 x 0.47 x 0.15 m

DUO PRESSURE ROLLER

For rubbing the seam of resilient floor coverings or pressing textile coverings into the adhesive bed.

Item no.	Product
73709	Duo pressure roller

SEAM ROLLER

With barrel-shaped steel roller, 45 mm wide, 30 mm Ø and wooden handle.

Item no.	Product
54690	Seam roller

RUBBING TOOL

- Lightweight, handy tool for rubbing down floor coverings, especially for stairs and edges.
- Rounded edges, thus no scratching of the coverings on the floor and wall
- Suitable for 45° and 90° edges

Item no.	Product
83734	Rubbing tool

GLIDE WITH REMOVABLE FELT COVER

Practical, lightweight scribe for working comfortably while standing. Ideal for textile and resilient coverings. Rubbing width 40 cm, galvanised.

Item no.	Product

CHAMFER KING

The new chamfer king was designed for professional design installation. Especially the case with modern design flooring, the bottom edge often has to be broken cleanly or an element shortened by a tenth. This very dynamic tool has emerged from practical experience. The integrated industrial blade is able to cut even stiff coverings effortlessly and absolutely cleanly due to its low thickness and extraordinary sharpness. The stops are designed in such a way that time-consuming replacement is unnecessary. The design covering can be extended or shortened without installation in the interim. Blade change and adjustment take less than a minute.

Item no.	Product
77741	Chamfer king

FASTRIMMER

For producing a 25° edge chamfer on the surfaces of vinyl tiles and design coverings after they have been cut to size. With quick stop for fast chamfering by hand or for chamfering on the adhesive bed!

Item no.	Product
15621	FasTrimmer Scope of delivery: FasTrimmer, Quick stop, transport bag, 6 spare blades

Item no.	Accessories	PU
15622	Stop for chamfering the underside of vinyl tiles and design coverings, for removing tear-off edges.	
80578	Spare blades	10 pieces

FASTRIMMER

With stop for chamfering the back of the covering and for cleaning up the broken edges.

Item no.	Product	
15623	FasTrimmer Scope of delivery: FasTrimmer, stop for chamfering the back of the base, transport bag, 6 spare blades	
Item no.	Accessories	PU

FRÄSMaster JOINT GROOVING MACHINE

THE NO. 1 JOINT CUTTER WITH CARBIDE GROOVING BLADE

Automatic depth control ensures the full formation of the milled joint even on uneven substrates. With adjustable side wheel e.g. for grouting rubber nap coverings.

Technical specifications

- Voltage: 230 V
- Power: 1,500 W
- Speed: 6,000-10,000 rpm
- Soft start

Principle of automatic depth control

Features

- Intervention protection when the machine is raised to prevent accidents
- Easy adjustment of the grooving depth up to 5 mm - even on very uneven floors
- No tilting due to optimum stability of the chassis on 3 rollers
- Protection against damage to the floor surface by automatic sliding back of the grooving blade together with the handle
- Soft start due to built-in electronic starting current limiter

50159	Fräsmaster joint grooving machine 115V US

FRÄSJUNIOR JOINT GROOVING MACHINE

FOR GROOVING ALL RESILIENT FLOOR COVERINGS

Easy grooving adjustment up to 5 mm depth.

Technical specifications

- Voltage: 230 V
- Power: 1500 W
- Speed: 8000 rpm

Features

- Secured against tilting due to optimum three-point support
- Clean preparation due to submersion principle
- Better chip ejection

WELDMASTER 2.0

THE AUTOMATIC WELDING MACHINE FOR PROFESSIONALS

The Weldmaster 2.0 with the latest technology offers precise welding results combined with high working speed. Special nozzles also allow grouting of PUR-coated coverings.

Technical specifications

- Voltage: 230 V
- Total power: 3,400 W
- Temperature: 20 - 600 °C
- Speed: 1 - 8 m/min

Features

- Digital thermometer for precise temperature control
- Central key pad for easy operation
- Can be used for all resilient coverings (vinyl, linoleum, rubber, etc.) without conversions
- Better welding results due to variable contact pressure
- 4-way welding nozzle: 4 individual nozzles ensure targeted distribution of the hot air
- Automatic wall shut-off with simultaneous lift-off of the heater and shut-off of the air supply.

PARQUET GROOVE MILLING MACHINE

FOR EASY RENOVATION OF SOLID WOOD FLOORBOARDS

Fast retightening of V-joints. Precise cutting to length of frames and door leaves. Extra comfort due to guide wheel Easy to work with.

Technical specifications

- Voltage: 230 V
- Power: 1,500 W
- Speed: 8,000 rpm
- Weight 5,2 kg
- Milling depth 0 - 5 mm
- Milling blade carbide diameter 130 mm, thickness 9.0 mm, 6 teeth

Features

- Parquet groove milling machine for reworking the V-groove that is no longer completely present after sanding solid wood floorboards
- Extra comfort due to guide wheel
- Easy to work with

Item no.	Scope of delivery
67323	Parquet groove milling machine Milling blade for profile grooves, adapter for vacuum cleaner, safety goggles, hearing protection, tool kit, dust bag, transport systainer, operating manual
